

### **Hublot graces the holiday season with colours**

Christmas lights, colourful decorations, party dresses and waves of laughter... Santa Claus is coming to town! Hublot is ready to grace this holiday season with two colourful timepieces and wish you a spectacular holiday!

#### **Spirit of Big Bang Vitrail**

Spirit of Big Bang Vitrail features the series' iconic tonneau case. The timepiece is not only a delight to the eye but also a pleasure to wear. Made of ceramics, the watch adapts quickly to the wearer's body temperature and will never give the wearer cold feet. The skeletonised dial is delicately divided into 20 frames with gorgeous and colourful Vitrail embedded on each frame. Resembling the Vitrail found in cathedrals, the Christmas theme on this watch tells its own tale. Once again, Hublot has brought the "Art of Fusion" into full play by incorporating the millennium-old Vitrail technique into modern watchmaking. The coloured glasses are secured on the dial with several O-shaped screws to make sure thermal expansion will not jeopardise the structure and the design. Made in Switzerland, the extra-strong red glasses are made to filter different spectrum of lights to create a crystal clear effect. Measured in millimetres and precisely cut with laser, these glasses are stable, durable and always colourful. Spirit of Big Bang Vitrail is matched with black rubber and red and black alligator straps to further accentuate the holiday atmosphere.
